Secure Drug Returns & Drug Disposal

FOURTH GENERATION FAMILY BUSINESS

It's all Been in the Family

From the sand and gravel business in the early 1940s to landfilling those same pits with 3,000 tons a day of municipal solid waste, the family's fourth generation is now leading the way to zero landfill of manufacturing waste and finished goods. Joseph Partyka founded the Partyka family business in the early 1940's and in the 1950's a metamorphosis occurred when his son Joseph Partyka, Jr. steered the company into the waste business. Today Joseph Partyka, Jr's grandsons are directing the family business from returns processing and assured destruction services to include zero waste operations.

Facility Manager

Francine Stenz, 30 years
Vice President

Philip Stenz, 2 years
Sustainability Manager

SECURE HANDLING & ACCREDITED WASTE PROCESSING

Handling & Processing of Your Non-Creditable Items

Return Logistics International Corporation has created a program to collect your non-creditable items. This program extends to healthcare facilities, retail pharmacies, reverse distributors, clinical trials, pharmaceutical wholesalers, veterinarians, and others. We offer pure destruction services for non-hazardous pharmaceuticals, including controlled substances (schedules I-V). We process, validate, record, and destroy the unrecyclable materials, therefore expediting acknowledgment and credit consideration by the manufacturers.

Therefore reducing:

- The abundance of waste that is deposited into landfills
- The amount of waste that is harming the environment
- Toxic chemicals that affect aquatic life
- The consumption of raw materials

SIMPLIFIED RETURNS

In a Few Simple Steps, RLI will Issue a Return Order Number

1. Request and sign an agreement. Prices vary depending waste type and volumes.
2. Complete a Return Order Advance Ship Notice.
3. Provide an inventory.
4. Let us know your Federal Tax ID number and who should receive the invoice.
5. Make certain we have on file a current copy of your DEA and State registration (Form 223).
6. Email to rx@returnlogistics.com or fax back to 912-748-5102

Upon acceptance, we will provide you with a Return Order Number (RON).

***Make sure the RON is on the outside of each box when shipping.*

ABOUT US

Established in 1996, Return Logistics Corporation is a waste and returns processing service provider for the pharmaceutical and personal care products industries. Return Logistics is permitted by the Georgia Department of Natural Resources as a Solid Waste Processing Facility. Return Logistics maintains permits and licenses for Solid Waste Processing, DEA Controlled Substances, generating large quantities of hazardous waste, DOT, and applicable state licenses. We understand that deciding which waste disposal company to select is yours. So, why should you choose Return Logistics? Along with the reasons that we have already expressed, we offer attention to detail, responsiveness, flexibility, and superior customer service. Finally, we work for YOU! Our entire staff is dedicated to servicing your needs. Return Logistics enables companies with environmental sustainability initiatives to attain the highest level of satisfaction concerning logistical packaging recycling and assured product destruction.

Sustainability - endurance of systems and processes

COLLECTION / SECURITY

PROCESSING / VALIDATING / REPORTING

FINAL DISPOSITION - SECURE / COMPLIANT

WHAT CUSTOMERS ARE SAYING ABOUT US

"Returns Logistics International (RLI) is by far the best reverse logistics company in the industry – bar none. Their in-depth experience in processing the destruction of pharmaceutical products, coupled with their CAN-DO attitude and superb customer service, places them head and shoulders above any competition.

We rely on the expertise and insight RLI has gained in the reverse logistics industry. On several occasions, we have asked them to work with our company to expedite the destruction of pharmaceutical product on short notice.

They simply deliver time and time again."
