A Valuable Partner to Zero Waste Operations

FOURTH GENERATION FAMILY BUSINESS

It's all Been in the Family

From the sand and gravel business in the early 1940s to landfilling those same pits with 3,000 tons a day of municipal solid waste, the family's fourth generation is now leading the way to zero landfill of manufacturing waste and finished goods. Joseph Partyka founded the Partyka family business in the early 1940's and in the 1950's a metamorphosis occurred when his son Joseph Partyka, Jr. steered the company into the waste business. Today Joseph Partyka, Jr.'s grandsons are directing the family business from returns processing and assured destruction services to include zero waste operations.

Over 120 Years of Experience Offered By RLI Management Staff

Kimberly Jackson, 16 years
Transportation & Disposal Manager

Roshima Montgomery, 15 years
Facility Manager

TAKING ON A LANDFILL-FREE PERSONA

Sustainability Goals

Return Logistics International Corporation can meet all of your environmental sustainability goals by sorting things out that are recyclable. We then use waste-to-energy, biogas recovery and cement kiln facilities exclusively to destroy the unrecyclable materials.

Therefore reducing:

- The abundance of waste that is deposited into landfills
- The amount of waste that is harming the environment
- Toxic chemicals that affect aquatic life
- The consumption of raw materials

SUSTAINABILITY SERVICES

Transportation Coordination

Our experienced transportation coordinators match scheduling requirements, equipment capabilities, security needs, and cost considerations for each client and shipment.

Chain of Custody Reporting

Under dual control, Return Logistics verifies and receipts for each load of material. We document the transportation, storage, destruction, and disposal with a portfolio of manifests, scale tickets, photos, and video evidence of the destruction process.

Secure Storage

Our 33,000 square foot facility provides a secure environment for short term storage and processing of materials for recycling and disposal. Security features of our facility include remotely monitored intrusion detection systems, a 15-camera CCTV system recorded to DVR with greater than 30-day recording, over 5,000 cubic feet of UL Class M vault space and 4,800 cubic feet of secured cage storage, both with badge access control.

Sustainable Disposal

Return Logistics utilizes a network of waste-to-energy incineration and cement kiln facilities for destruction and disposal services. By creating energy from waste, our services are environmentally efficient and cost effective. Witnessed destruction services can be accommodated with advance notice.

ABOUT US

Established in 1996, Return Logistics Corporation is a waste and returns processing service provider for the pharmaceutical and personal care products industries. Return Logistics is permitted by the Georgia Department of Natural Resources as a Solid Waste Processing Facility. Return Logistics maintains permits and licenses for Solid Waste Processing, DEA Controlled Substances, generating large quantities of hazardous waste, DOT, and applicable state licenses. We understand that deciding which waste disposal company to select is yours. So, why should you choose Return Logistics? Along with the reasons that we have already expressed, we offer attention to detail, responsiveness, flexibility, and superior customer service, and there is another reason to keep us in mind - we work for YOU! Our entire staff is dedicated to servicing your needs. Return Logistics enables companies with environmental sustainability initiatives to attain the highest level of satisfaction concerning logistical packaging recycling and assured product destruction.

Sorting Things Out: With Zero Waste to Landfill in Mind

RECYCLING OF PRODUCT PACKAGING

PLASTIC

PAPER

CARDBOARD

RECYCLING OF LOGISTICAL PACKAGING

SHRINK WRAP

PALLETS

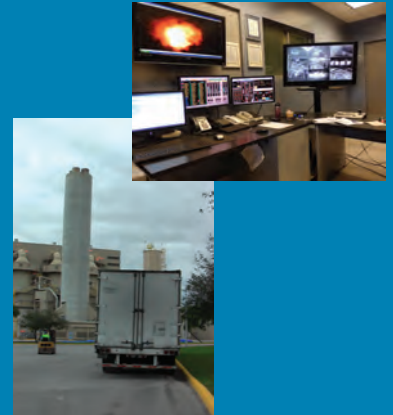

METALS

ENERGY RECOVERY FROM MANUFACTURING AND PRODUCT WASTE

CONVERTING WASTE INTO ELECTRICITY

WASTE DERIVED FUELS IN CEMENT KILNS

ADDITIONAL CAPABILITIES

Return Logistics not only handles recycling and the disposal of nonhazardous waste, we also provide return logistics services. From credit authorization to reconciliation, managing hazardous materials and final disposition, we can handle your entire reverse logistics process. So if your needs increase from sustainability services to other areas, you can find the same quality returns service with the same company.
